Dear Presidential Canidate

Hello, I hope you are having an exemplary day. Today I would like to talk to you about free healthcare because I feel like this is something that shouldn't be ignored any longer. Free healthcare has been a question in our country for a very long time. I believe that it is something that every person deserves, this would be something that I believe would make it so that we could help so many people who can never afford to go to the hospital and who will not go in less they absolutely need to. This is something that I know you care about and will look into if you get into the office and will try to get things to work.

We can make it so that the state or overall government pays for the cost of the bill as well as for the doctors and nurses so that they can keep their jobs and get fair pay. This is a great way to make sure that we can become a stronger nation with easy access to healthcare for all of our citizens.

We can always use funds from fund raisers if we do not have enough funds, however I believe that we do have enough to keep this up.

Sincerely, Press Secretary: Shaylih Mclean
